DRAWN BY M. THU REV 5 SHEET 1 OF 2

The record

Seven years keeping desks, stores and fleets running, from one service desk to four hundred shops. The habit underneath it is turning a repeat problem into a written process anyone on the desk can run.

May 2025 to now

Service Desk Analyst

IPH Limited MELBOURNE PERMANENT, FULL TIME

First and second level support for the IT and business users of every IPH member firm across Australia and New Zealand, reporting to the Service Delivery Manager (ANZ).

- Second-level escalation point for the service desk, guiding, training and mentoring the team.
- First point of contact by phone and ticket queue, troubleshooting onsite and remotely to SLA.
- Logs every request in the ticketing system and documents each fix in the knowledge base.
- Builds laptops, mobiles and computers to the SOE, and onboards and offboards users.
- Active Directory, systems configuration and maintenance, meeting room AV and mobiles.
- Monitors outage alerts, sends communications to all firms, and improves desk processes.
- Strategic IT projects across the firms, handover to BAU, and Change Board representation.
- After-hours on-call for critical incidents, cyber security controls and the annual IT audit.

Feb 2023 to May 2025

IT Support Analyst

The Reject Shop MELBOURNE

Level one and two support for more than four hundred stores, the Store Support Centre and the distribution centres, reporting to the IT Service Delivery Lead.

- Kept desktops, laptops and servers up every business day, with daily health checks.
- Diagnosed hardware within a day and configured software within two to four hours.
- SOE builds with Windows Deployment Services, and accounts ready before a starter's first day.
- Active Directory, Exchange, Teams and Microsoft 365, imaging, printers and server support.
- Network addressing and access, equipment rollouts, and training for users.
- Cleared forty to fifty tickets on a heavy day, and led the dock rollout and its playbook.

Jul 2022 to Nov 2022

Support Engineer

Azured Consulting AUSTRALIA

Service desk for a managed service provider and Telstra cloud partner: level three network and firewall configuration, client cloud environments and Microsoft 365 accounts.

Jun 2019 to Oct 2024

Office Support Assistant

MYER AUSTRALIA

Store operations alongside study and the early IT roles: end-of-day reporting, online returns, point of sale, and training team members on the floor systems.

Case files

ENDPOINT, ROLLOUT

Docks out, hubs in

Retail docks kept failing across 400+ stores, each one a replacement and a callout. Replaced them with daisy-chained hub monitors and wrote the rollout playbook: simpler desks, far fewer failures.

SERVICE DESK, KNOWLEDGE

Memory, written down

The same issues kept coming back to the same people. Documented procedures, knowledge articles and escalation paths, and became the second-level point, so new starters pick the desk up quickly.

IDENTITY, DEVICES

Day-one access

No two machines left the bench the same way. Standard builds with Active Directory and Microsoft 365 administration took joiners and leavers end to end: compliant endpoints, a tidy account lifecycle.

Poker Money

A free app for private home games at **pokermoney.org**. Buy-ins and cash-outs go in, and it works out who pays whom in the fewest transfers. It keeps the score and never touches the money.

ROLE	Lead contributor, built with three friends and run as a live service.
BUILD	A vanilla JavaScript web app on a Cloudflare Worker and D1. Installs on a phone, works offline, and ships to Android as a Trusted Web Activity.
SECURITY	Verified self-serve sign-up, roles enforced on the server including a read-only viewer, and private crews whose isolation is proven by tests.
PROOF	491 automated tests across 19 suites, guarding the settlement maths and keeping every crew's data separate. No ads and no tracking scripts.

Study and kit

STUDY

BBus, Information Systems
RMIT University, 2019 to 2021

Diploma of Information Technology
RMIT University, 2018

Foundation, Information Technology
Trinity College, University of Melbourne, 2016 to 2017

KIT

Microsoft Intune · Entra ID · Windows Autopilot · Azure · Microsoft 365 · Active Directory · PowerShell · Exchange · Teams · Endpoint security · ITSM and change · Standard builds

Burmese, native. English, professional working.

OFF THE CLOCK Football, MOBAs and Souls-like games (never horror), building apps with AI for an audience of one, and learning new skills and technology.
